

LIFE EXPLORER

Parent Guide

Expedition One: Antarctica

Life Category: Travel

Welcome to Life Explorer

Congratulations! You've begun a different kind of homeschool. Life Explorer is built around curiosity rather than checklists. Reading, writing, math, science, art, geography, and history are tools children use to explore life—not the destination.

Our Philosophy

Traditional schools organize learning into subjects. Life Explorer organizes learning around twelve Life Categories: Fun, Health, Travel, Love, Family, Social, Home, Work, Money, Stuff, Giving, and Spirituality. The life category provides the context. Curiosity provides the direction. Academic skills become the tools.

Our Goal

Our goal is to raise children who know how to learn. We want them to ask thoughtful questions, investigate, communicate, create, and enjoy learning.

The Parent's Role

You are not expected to know everything. You are your child's Lead Explorer. Whenever possible, replace answers with questions like, 'How could we find out?'

The Learning Cycle

1. Wonder — What do I know? What do I wonder?
2. Investigate — Books, videos, experiments, conversations, field trips.
3. Create — Build, draw, write, present.
4. Reflect — What surprised me? What did I learn?
5. Continue — Every answer leads to another question.

The Wonder Wall

Use three columns: **What I Know**, **What I Wonder**, and **What I Learned**. Record your child's words exactly as spoken. Resist correcting. Curiosity comes first.

Daily Rhythm

Morning Gathering (read aloud, discussion, Wonder Wall), Skills Practice (reading, writing, handwriting, math), Expedition Time (research, experiments, projects), Reflection (favorite discovery, biggest surprise, new wonder).

Progress Over Perfection

Some days you'll spend an hour chasing one question. That's success. Children remember how learning felt more than how many worksheets they completed.

Academic Skills

Reading, writing, mathematics, science, geography, communication, and critical thinking are intentionally woven into every expedition. The teacher guide handles the integration so you can stay present.

A Note from the Founders

We didn't create Life Explorer because education needed more information. We created it because childhood deserved more wonder. Our hope is that these expeditions bring your family closer together and help your children discover that learning is one of life's greatest adventures.
